

MANUEL ANTÓNIO ASSUNÇÃO
University of Aveiro

A WORD FROM THE RECTOR

“ Research is a key strategic element, facilitating the mission of the University of Aveiro. Firstly, because the quality of research is an indicator of the installed capacity and potential to produce new knowledge; secondly because a strong research workforce potentiates a greater demand for collaboration by industry and a better accomplishment in raising national and international projects and, thirdly, because high-level researchers and infrastructures also help attracting students for all teaching levels. High-level research facilitates, thus, the continued success of the University of Aveiro.”
