

Academia de Verão

SUMMER ACADEMY

The Summer Academy is an initiative of the University of Aveiro (UAveiro) that every year provides a first contact with academic life and a diverse set of scientific, sports and leisure activities, especially for students from the 5th to 12th grades. In 2022, the event held its 16th edition, and counted on the participation of 439 students.

The scientific activities are organized by both the organic and research units of UAveiro – in a total of 16 departments, 3 polytechnic schools and 20 research units, each proposing activity programs for each Summer Academy edition.

UAveiro organizational culture has always been committed to the promotion of the public acknowledgment of science, the concern in communicating the scientific advances at UAveiro and the development of “science for all” initiatives. Since its foundation, UAveiro promoted an Open Day, later transforming it into an Open Week, and recently creating the Summer Academy, which is dedicated to strengthening the ties between society and the scientific world and promoting the scientific areas and the different offer of study cycles. The creation of a dedicated communication structure for UAveiro, in the mid-1990s, and the Fábrica – Live Science Centre, in 2004, were very innovative and pioneer initiatives in the context of Portuguese universities. Nowadays, these structures develop permanent activities and are devoted to the global university community.

UAveiro concerns about science outreach and public engagement with scientific and technological issues is also seen as an opportunity of improvement of the citizenship and welfare of our society. This is an all-year round premise that is also laid in the Summer Academy objectives.

Children and young students are welcome and challenged to join scientific and cultural activities proposed by the UAveiro, especially during the summer period, and also other initiatives during the academic year.
